**Gelpi**

**RETRACTOR**

Length: 7in

Inventor: Dr. Maurice Joseph  
Gelpi

EST.  
1913

## Retractor Gelpi Sharp, 7in

### Common Uses:

Orthopedic Surgery, Spine Surgery

### Properties:

- Sharp Prongs
- Finger-ring Handle
- Hinged
- Ratchet Lock Mechanism
- Self-retaining

### Function:

The Gelpi retractor is a self-retaining retractor that holds back tissue and organs during surgical procedures. The locking mechanism keeps the tool in space and provides exceptional hold for the surgery.

### Did you know?

Dr. Maurice Gelpi is known for the development of a self-retaining perineal retractor, now known as the Gelpi retractor (Originally made by V. Mueller & Co, 1911).
