

LEWIN BONE

CLAMP

Length: 7in
Author: Unknown

EST.
1900's

Lewin Bone Clamp 185 mm, 7in, Serrated

Common Uses:

Neuro, Ortho and Spine procedures

Primary Properties:

- Ring Handle
- Ratchet

Variations:

- Smooth jaws
- Lengths: 5 1/4 in - 7 in
- Curved/Angled

Function:

This instrument is used to hold and align bone segments when resetting fractures.

Did you know?

A unique feature of this clamp is the extra long ratchet that gives it an increased spectrum of widths as well as a slight curvature which allows it to be contoured to the bone shafts.
