ANDREWS PYNCHON

SUCTION

Length: 9 IN

Author: Andrews - Pynchon

EST.
1918

Suction Andrews Pynchon Curved, 9in

Common Uses:

Laryngoscopic and surgical procedures

Properties:

- Blunt tip
- Curved for tracheal work

Variations:

- w/ Removal Shaft
- w/ Removal Tip

Function:

This suction tube is used to clear away fluids and debris from the surgical field, most commonly in laryngoscopic procedures. It is slightly curved and contains either a removable tip or a removable shaft to assist with different suction processes throughout a surgical procedure.

Did you know?

The Andrews Pynchon suction tube is designed with a tapered handle to create a comfortable and secure grip when held.
