WEITLANER

RETRACTOR

Length: 6.5 IN

Prongs: 3x4, Blunt

Author: Franz Weitlaner

EST.
1905

Retractor Weitlaner 3x4, Blunt, 6 1/2in

Common Uses:

Plastic Basic Surgery, Large Bone & Joint Procedures

Variations:

- Tips - Sharp or Blunt
- Lead Blades - 2 to 6 Prongs
- Common Lengths - 5-9in
- Curved Shanks - Hinged or Fixed

Function:

Pronged blades hold the edges of a surgical incision open while the ratcheted lock function holds the incision opening in place without manual assistance.

Did you know?

Mr. Weitlaner originally majored in theology before switching to medicine in 1902. We sure are thankful for this change of heart!
