Crafoord

Auricle Clamp

Length: 9 1/2in

Author: Clarence Crafoord

EST.
N/A

Crafoord Auricle Clamp, 9 1/2in

Common Uses:

Thoracic and Cardiovascular Procedures

Properties:

- Longitudinal Serrations

Variations:

- Medium-CVD
- Heavy-CVD

Function:

These ring-handled forceps are used to aid the manipulation of auricles in the heart during thoracic surgeries. They are well suited for this due to the long, slightly curved shaft, which creates distance to keep the field uncluttered.

Did you know?

Crafoord performed the first surgical correction of aortic coarctation in 1944.
