Kilner**Needle Holder**

Length: 135 mm

Author: Thomas Pomfret Kilner

EST.
1912

Needle Holder Kilner 5 3/8in

Common Uses:

Plastic Surgery for Delicate Skin Sutures.

Properties:

- Working Surface: Serrated w/Groove
- Tips: Blunt
- Common Length: 5-7in
- Material: Stainless Steel, TC
- Handle Curvature: "S" curved
- Handle: Ring w/ Locking Mechanism

Function:

Holds delicate suture needles in place between its serrated jaws, while locking mechanism on handle holds the clamp in place while suturing is preformed. The unique "S" curvature of its shank specializes the instrument for certain procedures.

Did you know?

After World War I, there were only two full-time plastic surgeons in the England: Kilner and Gillies (Kilner's teacher).
